

SHRIMP FARM EQUIPMENT SUPPLIER

Short Course in Aquaculture

SMART SHRIMP FARMING IN CIRCULAR PONDS

Organized by AIT Thailand, Vannamei 101, and Aqua Mina Vietnam

ABOUT THE COURSE

Intensive shrimp production in circular tanks is trending in several Asian countries, particularly Vietnam and Indonesia, underlining the concept of the circular economy towards eliminating aquaculture effluents for greater sustainability. This training will take you through the emerging concepts and practices of circular pond farming techniques for white shrimp and all the associated information to intensify shrimp production sustainably. Led by international experts, this training is organized in Vietnam, and you will also visit circular-pond shrimp farms in Vietnam to learn the best management practices followed.

17 – 23 March 2024
